Introducing the 710-ACM Book Return Drop Box!

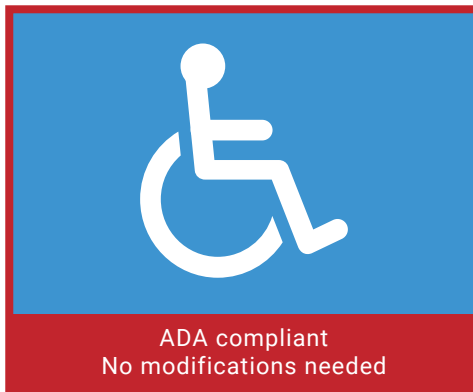

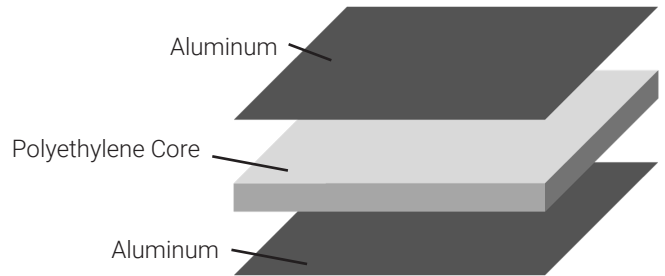

American Security Cabinets is thrilled to unveil its newest Book Return variant, boasting a more cost-efficient and sustainable design convenient for libraries, schools, nonprofits, and more. These next-generation drop boxes are expertly crafted for convenient, self-assembly to help you save time and resources while still offering the same level of customization and support synonymous with our core offerings.

Manufactured in Sauk Rapids, Minnesota, our drop boxes are designed with safety and security in mind. Design your book return to showcase your organization's color palette, brand identity, sponsors, and more. Choose from one of our popular themes or work with our graphic design team and create fully customized graphics based on your specific needs!

Aluminum composite material (ACM) is a versatile building material composed of two pre-finished aluminum sheets bonded to either side of a polyethylene core.

ACM combines the lightweight, corrosion-resistant properties of aluminum with the strength and durability of the core, making it a popular choice for architectural cladding, retail signage, transportation, and other various applications across a wide range of industries.

Specifications:
